Flail mower MS 170 is used in agriculture for shredding straw (wheat, barley, rice, soy ...).
 System with straight knives and counter knives with small clearance ensures safe and high quality cutting of straw on only 2-3 cm in length.
 Deflectors allow uniform dispersion of straw mass on surface. Support wheels as standard. Rotor with more than 3000 min⁻¹. Aforementioned ranks flail mower MS 170 far ahead of the competition.

High-quality knives from a special material with peripheral speed of over 80 m/s (290 km/h) shreds all plant residues. Tests have exceeded the quality of shredding and showed high durability of the machine.

Adjustable deflectors allow uniform dispersion of straw mass on surface.

Model	MS 170
Technical data	
Working width [cm]	170
Width [cm]	190
Power requirements [kW/HP]	35-45/50-60
P.T.O. min ⁻¹	540
Rotor min ⁻¹	3000
Weight [kg]	443
No. of knives [pcs]	64
No. of counter blades [pcs]	65
3-point linkage I and II cat.
