

Ecological cleaner with rubber bands
for vineyards and orchards.

WEEDER

Optional Flail Mower Equipment

Scan the QR code for more information:

Model:
PLETVENIK 90
(WEEDER 90)

Oil:
20-30 L/min;
160-215 bar

Outer range:
20-30 cm

The device was developed for mechanical weed control in row crops to remove smaller leaves and to mow the grass.

The machine is perfect for organic farming and allows the use of herbicides in production to be eliminated. The rubber bands are soft so they won't damage the vine or trees.

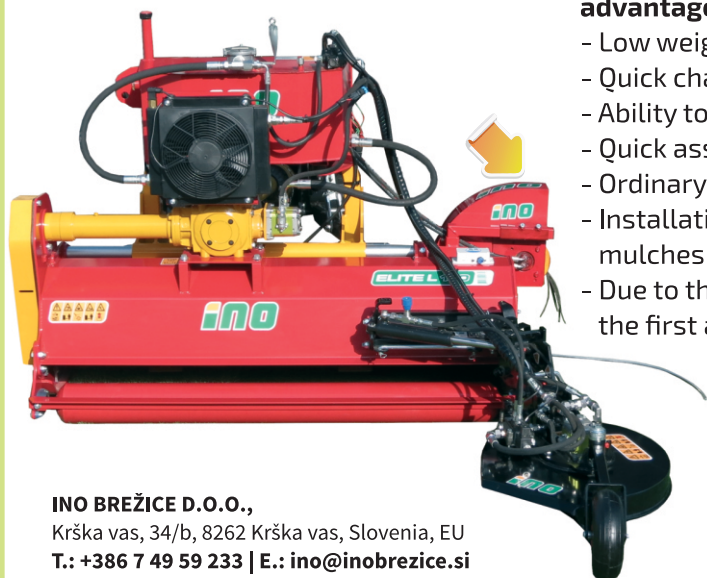

Replacing the rubber bands is quick and easy, and the parts can be easily disassembled and repaired.

Vine and fruit tree cleaner advantages:

- Low weight of the machine
- Quick change of work straps
- Ability to use different types of work straps
- Quick assembly/disassembly of the machine on the mulcher
- Ordinary hydraulic clamp (20 l/min flow)
- Installation in front of the mulcher (so that the mulcher then mulches the grass - this is a nuisance)
- Due to the small size, the possibility of assembly between the first and last wheel of the tractor (simple monitoring while driving)

Do not use vine and fruit tree cleaners when turning!
